

From The Author of
The Career Rapist and Women of Courage

The series, *Do This In Remembrance of Me*, is a must read for every woman living in America regardless of status. Doctors, lawyers, engineers, waitresses, housewives, everyone needs to read this series because only then will you have the tools to save your life. You need to know how other women **have been** murdered in this country in order to protect yourself. Do not sit there thinking you are safe because the very woman who smugly thinks she is safe because of her status in life is the first woman murdered. January 19,

2009 Mrs. Elaine Anderson, the wife of a prominent Lubbock, Texas orthodontist, was shot to death in her home. Her mother, Alice Johnson, was found shot to death in her home next door. Dr. Christopher Anderson left a suicide note. May 29, 2009 Mrs. Isabel Hall, 49, of Harrodsburg, Kentucky was seen physically fighting her husband, Dr. Steven Hall, aboard their pontoon boat. Hours later her body was found in the water. She had been run over by their boat. The propeller cut her deeply on the left side of the head, her left forearm and upper arm. Her husband was charged and later convicted of manslaughter. September 21, 2009 Mrs. Diane Ward died in the master bedroom of her \$5.2 million mansion in the tony Isleworth subdivision near Orlando, Florida from a gunshot wound to the face. Her husband, Bob, phoned 911 and told the dispatcher that he had shot his wife. He was convicted.

Nothing exempts you from being murdered; not money, not station and surely not religion. Jennifer Blagg of Grand Junction, Colorado, probably thought she was safe in her marriage. She attended church regularly and tried to live a decent life.

Her husband would not commit murder after she discussed his indulgence in pornography over the Internet. She was not safe. She turned her back on her husband and lost her life. Her husband, Michael, shot her to death November 12, 2001 while she was sleeping. Mrs. Blagg had argued with her husband about his Internet use of pornography. After the argument she went to sleep. While she was sleeping he killed her. She never had the chance to try and fight for her life. One favorite maneuver of men is killing their wives while they sleep. That is what some men do they ambush their wives or girlfriends. Men are practiced in the art of warfare from childhood. Mr. Blagg not only shot his wife to death while she was sleeping, he killed their daughter, Abby Blagg, age six. Mrs. Blagg's body was found in a landfill. Abby Blagg's body was never found. Mrs. Blagg's husband preferred to kill his wife and his daughter rather than deal with a divorce and have everyone know the divorce was due to his conduct. During his trial the prosecutor said Mrs. Blagg was seeking a divorce. She was still living at home, a fatal mistake.

Women are being murdered in this country because they do not know they are in danger. Many women live their lives wearing blinders. Lives could be saved if women are not only told danger signs and warnings but women pay attention to this information. So many women ignore information on domestic violence, sexual assaults and date rape because they believed this information does not apply to them because of where they live or how much money they have in the bank or their social status. "I don't want to know." "It's too awful." "I'd rather eat my lunch and think of more pleasant things." "I live in the suburbs. I do things right. I am not like those people." None of this matter when it comes to having the tools to save your life. Do not ignore any information as it relates to violence. Read this information. Rehearse this information and discuss this information with others.

Murder is not a spontaneous combustion. Murder is a brew that percolates in a man's mind for year.

My research showed that women talk too much and women make too many assumptions and that is why men are able to murder them. Women assume they can return home to get their clothes after a separation. They are wrong. Men use possessions to lure women to their deaths. Forget about your possessions. You can buy new clothes. You can make new pictures. You cannot make any assumption when it comes to violence. Once you have the argument and you carelessly say you want to leave your life is in danger. Shut up during an argument. I don't care what you want to say. Shut Up. Make your plans and leave telling no one and never return. Leave the state. And do not think after the divorce that you are safe. Thousands of ex-wives are murdered every year. The men ambush them when they come home from work. They murder the women while at work or they enter their homes at night and kill their ex-wives. Men also hire hit men to kill their ex-wives. So do not think you are safe after a divorce. Leave the state.

Women invite murderers into their lives and into their homes. These are not flattering characteristics, but nevertheless true of many women. Understanding these facts can lead to the solutions of some murders and the prevention of others. The key lies in why women talk so much and how they make assumptions. I want women to know if women change the way they think they can reduce the possibilities that they will become a victim thus saving their life and the lives of their children.

Black women, you must learn to retreat during arguments. You walk around everyday with your fists balled up because you are constantly facing disrespect and you are tired of it. You are angry at the abuse. Many of you rather fight than back down. Granted, as girls you have had to fight males to get respect, but you must realize as an adult you are facing a different animal when you are arguing. Retreat, if not for yourself retreat for your children. Stop making arguing a matter of pride. Retreat and live. Once he throws the first punch you must decide to leave. Keep your mouth shut, make your plans then leave. And keep

your loud mouth girlfriend out of your business. She will not be the one to die if the man you are arguing with decides to kill. Black children are being destroyed in foster care. The most wretched human being is a motherless child. Retreat and live so that you can take care of your children and not leave them to languish in foster care. There is a child living in foster care in Oak Park, Michigan. He is not allowed to come home after school until night fall, consequently he walks the street and visits friends until he is allowed to come home. He gambles in the bathroom for spending money. If his mother was alive this would not be so.

Retreat during an argument and stay alive to raise your children. Also before you work and put your husband through school you have a prenuptial agreement drawn up and signed where he is responsible for your support if he decides to graduate from college and divorce you. This money shall be in addition to the child support he has to pay. When you put your husband through school, you made a financial investment in him. You should realize a return on your investment. That's just business. Also have your wishes recorded as to who you want to raise your children in the event of your demise.

I conducted this research and wrote this series because I was sick and tired of reading about women being murdered in this country, women being burned alive in India, and women being castigated in Africa. Women from foreign shores come to this country and when they try to assimilate and become American women they are killed. This is not right and it must be stopped. The first time an immigrant hits his wife he should be deported. His wife and children should be given the option of remaining in this country. Hitting your wife is not the "American Way."

My research showed me violence is not our number one problem. Our number one problem for women is women do not have a general consensus as what we should do about violence in our country. And we do not have a general consensus because women remain divided. We remain divided because we keep thinking we are different from one another. Women refuse to work together. We are trying to play the

man's game. We persist in being driven by the need to feel superior; the need to be the prettiest, the need to be the sexiest. As if being superior, pretty and sexy is all there is to life. We remain separated by our breast and buttock size. We continue to allow men to divide us. We continue to seek to be led. We continue to allow men to think for us; men who do not necessarily have our best interest at heart. You may disagree with this statement but I can support this assertion with reams of documentation.

All of us need to work together to rid our nation of violence making our streets safe again. The first decision all of us need to make is that we are all going to get involved and do whatever we can do in any capacity to end violence in our nation. Ending violence begins with everyone. It begins with our changing and making up our minds that we are going to confront this issues with all of our resources until we see a drastic change in the statistics being reported on the number of murders and rapes being committed in this country and the number of juveniles crimes being committed in this country.

Women need to have open discussions with their sons regarding sex and the treatment of women. Women need to pay attention to their sons who exhibit low self esteem and lack of confidence. If you do not constantly discuss your son's behavior with him he may end up in prison. Mothers must train their sons not to be followers; that rape is wrong. These subjects must be openly discussed in the home over and over again. Bullies are stupid, not smart. Do you want to sit in a court room listening to a prosecutor tell the world your son is a rapist because he follow the crowd and abused a young woman in a dorm room? **Surely not,** so talk to your son about the treatment of women.

And finally, you need to constantly check you husband's outdoor activity. Do not sit at home and allow him to amass a fortune and put that money in his girlfriend's name. Do not let him sell your home out from under you. Do not allow him to give you a bunch of papers and tell you to sign them. Tell him to put the papers down you will read them later. If he becomes irritated, you know something is wrong. He is

hiding something. Do not sign your income tax forms and allow your husband to mail them off. Those forms can be modified on the way to the mail box. IRS will mail you a copy of the all income tax forms you file. If you order the forms keep it to yourself. Do not have the forms sent to your home. Do not allow your husband to put his raises in company stocks. He may tell you he has not gotten a raise in years since you see his pay check every week, when actually he told his employer he wanted to purchase company stock with his raise which he plans to sell as soon as he divorces you and leave the country for South America where he can live cheaply for the rest of his life. When a man hides his assets from his wife, this is economic violence. Be friendly with other company wives you will be surprised what you will learn about company policies just by listening. Keep up with your husband's bank accounts, safe deposit boxes, retirement packets and earning statement from social security. Do not wait until you are 65 years old and be shocked when you apply for social security and learn your husband has another child receiving social security under his name. Life is not Alice in Wonderland. Every now and then hire a private detective. He will help you see all around you. Remember we only have peripheral vision. With a private detective you will see in 360 degrees, what is going on behind your back! You must be assertive you will get more respect from your husband. Remember Women Must Always, Look, Listen and Pry. It is only good manners,
